

# THE DREAM REALIZED

Easy to Use | Powerful | Mobile Investigation | Scene Visualization

**What if you could solve more cases, improve accuracy, minimize downtime and lags in communication, lower costs, and maximize utilization of resources? Incident Response 360 eliminates barriers commonly faced during the investigative process from start to finish.**

Incident Response 360 is a cloud-deployable, enterprise investigation and information management system providing rapid access to data whenever and wherever needed, whether in connected or disconnected mode. Scalable for single and multi-agency use, it serves multiple facets of an investigation. A flexible and configurable solution, the product features embedded interfacing with 3<sup>rd</sup> party systems and helps agencies effectively manage data and resources.

- Dynamically Scalable for any Size Incident
- Operates while Connected/Disconnected
- Simplified Item and Evidence Collection
- Predictive Evidence and Item Matching
- 4D Scene Reconstruction and Visualization
- Automated Case Data Reconciliation
- Multi Agency Response Coordination

## Collect Evidence, Create Cases in the Field

Capture information directly from sources in the field using Tablets, PCs, Smartphones and Cameras. Document a scene including all items collected as evidence or property. Officers, investigators and other approved users have access to an easy-to-use interface presenting text fields and drop down menus which allow for the rapid capture of key location and scene information. Create scene sub-location information to document places such as kitchens, bedrooms, or places within bedrooms to indicate where the collected items originated. Easily access menu tabs which are configured to document vehicles, bodies and POI.

## Organize and Reconcile Case Data

Conduct a collaborative session to reconcile and prepare the data for downstream storage and/or analysis. Multiple agencies can configure collaborating groups to share information. Supporting data such as offense, agency, agency case number and general comments can be added along with the disposition of property, evidence or bodies.

Case Number	Status	Incident Date	Incident Type	Officer	Reporting Agency	Agency Number
2014-00023	Open	10/06/2014	Crime Scene Response	Jim Carter	Leedington Police	DP19438
2014-00024	Open	10/16/2014	Crime Scene Response	Bob Burrows	Leedington Police	DP19437
2014-00025	Open	10/06/2014	Crime Scene Response	Jim Carter	Leedington Police	DP19438
2014-00024	Open	10/16/2014	Crime Scene Response	Bob Burrows	Leedington Police	DP19437

The Incident Response 360 application displays historical and current case data, and lets you maintain an unlimited number of images associated with the record.

## Intelligent Matching of Evidence Items

Incident Response 360 provides intelligence tools that automatically search through all data held on an investigation looking for "connections" and commonalities that link it to other suspects, cases, and incidents. The system enables ad-hoc reporting on everything about the collected case data for investigation managers which allows them to assess the reports and assign investigation tasks and collaborate with other internal and external parties and collaborators.

### Cloud-deployable

Incident Response 360 is cloud-deployable for enterprise-wide access to data from virtually anywhere. The solution combines the advantages of an enterprise system with the benefits of mobile devices. The product allows application delivery and access from PCs and tablets. Additionally, the product supports on-premise, hybrid, in addition to full cloud deployments on Microsoft Azure Government in the United States and complies with FedRamp and CJIS.

### Flexible, Scalable, and Configurable

Incident Response 360 is designed to accommodate agencies of any size and will grow with them to meet their ever changing requirements. Additional benefits include:

- Modern technology and industry-standard frameworks that support future expansion
- Simple user interface that is configurable to support agency specific requirements for data management
- Automatically notify users when data has been updated or changed which ensures that they are informed of critical data changes related to cases and evidence

### Easy, Uniform Reporting

- Easy-to-use, step by step wizards for uniform reporting standards
- Eliminates inconsistent policy interpretation
- Automated fields and built in spell checking minimizes data entry errors
- Scene Collected Items report provides basic scene details as well as the listing of evidence items, suspects

### Windows 10 Ready

Microsoft Windows 10 (32-bit and 64-bit) is certified as a desktop client operating system for end-users accessing Incident Response 360. Windows 10 enables us to build on our commitment to provide a common Windows platform and provide our clients with one consistent user experience across their devices.

### COMPLIANCE

- Ensures compliance on all investigations through built-in reminders for users on key topical areas
- Detailed audit trails, tracking and reporting features also provide a strong case if any proceeding questions evidence handling methods

### About Forensic Advantage® Systems

Forensic Advantage® Systems helps the world of government agencies work smarter with higher quality results. The company's software and solutions are designed to create safer communities and more reliable operations for its user base. At Forensic Advantage® Systems our goal is to revolutionize the field of mobile application technology through the use of secure, easy-to-use, Azure based software innovations. We deliver applications more efficiently because they are scalable, cost-effective cloud based products that enable agencies reduce costs and deliver essential services as they maximize existing technology investments and maintain fiscal responsibility.
