

MEDICAL EXAMINER CASE MANAGEMENT SYSTEM v16.1

The **Forensic Advantage® Medical Examiner** application ensures immediate access to data, improves productivity, increases quality, eliminates paper and enhances the ability to collaborate throughout the lifecycle of a case. The COTS application provides a comprehensive technology stack that enables the highest degree of collaboration capabilities for staff members to work any case, across multiple disciplines, agencies, or laboratories that may be geographically dispersed internally or externally to an organization. The product addresses all types of death investigations with a powerful case management framework that tracks examinations, lab work, and autopsies.

KEY FEATURES

- User-friendly tools deliver a clear view of important information such as specimen and property status including a secure chain-of-custody from scene through final disposition.
- Preliminary, contributory, cause/manner of death, ICD codes, findings and body disposition status
- Flexible utilities allow updates of case related status information. Fully customizable system views show the status of every pending task for every case. System flags indicate when a body is allowed to be released to funeral homes, crematory, research facility or university
- Simple management of the electronic case such as reserving a case number, collecting investigation information, analysis forms configuration and generating investigation and autopsy findings as well as management reports
- Quickly process a body; inventory property, make observations and collect specimens. Allows examiners to incorporate laboratory functions such as organ procurement, X-ray, toxicology lab orders and comprehensive autopsies
- Unified communications across internal and external users regarding the investigation status details (i.e. pending, active or closed)
- Dozens of customized views and over 70 customizable and configurable screens to capture and report critical case data
- Easily configure and rapidly deploy with a guaranteed implementation from a world-class professional services organization

Case Number	Case Name	Date	Status	Case Type	Case Type	Case Status	Reason of Death

MEDICAL EXAMINER CASE MANAGEMENT SYSTEM v16.1

Forensic Advantage ME is an extensive case management system designed specifically to meet the needs of coroner and medical examiner offices regardless of size or location.

KEY FUNCTIONS

INVESTIGATION

Track scene visits, related incidents, injuries, drug involvement, special circumstances, investigation narratives and findings.

MORGUE AND AUTOPSY

Body prep, personal effects, specimens, lab orders, exams, histology, microbiology, autopsy, MOD/COD findings, death certification, custom autopsy finding templates tailored to examiner preferences, style, and verbiage.

HUMAN IDENTIFICATION

Routine identification, dental, fingerprint, DNA, radiograph, anthropology, non-human, larynx, and missing person comparison.

ADMINISTRATION

Disease reporting, referrals, organ procurement, records requests, death certification tracking, final disposition, custom forms and documents.

FLEXIBLE PLATFORM

Analytical screens can be customized by an administrator to show, hide, position, group, and order data entry fields exactly as desired. Instant spell check, custom medical dictionaries, and full control over design of forms and documents provide flexibility to meet specific business process needs.

- Grid views are customized at the user level with administrative control over the layout of each form
- System views can be customized by and for each end user to tailor visible information to specific work requirements including custom filtering, grouping, and sorting based on user login privileges

CLOUD AND ON PREMISE DELIVERY

As with our enterprise on premise edition, the Forensic Advantage® online version is ideal for organizations with a limited number of IT support resources or have the need to lower operational costs. While still maintaining the full range of features as our enterprise edition, the online version requires even less maintenance effort to maintain and includes the following benefits:

- State-of-the-art high security environment
- No dedicated LIMS servers to purchase or maintain
- Enables "always on" access from any computer with Internet access
- Support, hosting and licensing is all bundled into an affordable monthly fee
- Preconfigured nomenclature and workflow can be configured to match business processes for a high value streamlined implementations
