

## Sexual Assault Kit Tracking System

Forensic Advantage SAK Tracking System is a unique and powerful application designed to improve SAK processing requirements and enable victims to monitor status updates.

### Flexible, Scalable, and Configurable

The application is designed to accommodate agencies of any size and will adapt to meet your ever-changing SAK tracking requirements. The architecture includes modern technology and industry-standard frameworks to support future expansion.

### Key Features

- Track actions taken by collection sites, storage facilities, law enforcement and laboratories
- Provide reporting including SAK statistics and analysis
- Track kit statuses (in process or completed)
- Track transfers between agencies
- Provide user-specific workflows
- Track number of kits submitted
- Provide audit trail
- Deploy on premises or in the cloud
- Provide victim access to kit status
- Stand-alone or integrate with Forensic Advantage LIMS for additional process automation
- Provide enterprise system with mobile accessibility
- Track which kits were sent to each agency
- Track number of kits supplied vs. number of kits submitted
- Track expiration and/or date of destruction of each kit
