

## Medical Examiner Case Management System

The Forensic Advantage Medical Examiner application is designed to meet the needs of coroner and medical examiner offices regardless of size or location. Easily configured to your work processes and deployed rapidly.

### Key Features

#### Investigation

Track scene visits, related incidents, injuries, drug involvement, special circumstances, investigation narratives and findings.

#### Morgue and Autopsy

Body prep, personal effects, specimens, lab orders, exams, histology, microbiology, autopsy, MOD/COD findings, death certification, custom autopsy finding templates tailored to examiner preferences, style, and verbiage.

#### Toxicology

Test biological samples, identify chemicals, batch, preserve and analyze with instrument integration.

#### Human Identification

Routine identification, dental, fingerprint, DNA, radiograph, anthropology, nonhuman, larynx, mass casualty and missing person comparison.

#### Administration

Disease reporting, referrals, organ procurement, records requests, death certification tracking, final disposition, custom forms and documents.

### Customizable

Over 70 fully customizable system views capture and report critical case data, as well as show status information for every case.

### Process Quickly

Quickly process a body, inventory property, make observations and collect specimens to help examiners incorporate laboratory functions such as organ procurement, X-ray, toxicology lab orders and comprehensive autopsies.

### User Friendly Tools

Deliver important information such as specimen and property status, and a secure chain-of-custody from scene through final disposition.

### Multiple Status Options

Preliminary, contributory, cause/manner of death, ICD codes, findings and body disposition status.

### Simple Electronic Case Management

Such as reserving a case number, collecting investigation information, analysis forms configuration, and generating investigation and autopsy findings.
