

Nlets Cloud

Trusted Partners in Cloud Data Security

Our commitment goes beyond just a partnership – it's a pledge of accountability, responsibility, and ownership in safeguarding your data in the cloud. At Forensic Advantage, you can trust in a collaboration that prioritizes the protection and integrity of your valuable information.

Forensic Advantage Systems is a strategic partner with Nlets, the nation's premiere interstate justice and public safety network.

- FIPS 140-2 NIST certified encryption utilized throughout all applications
- Annual "SOC 2 Type 2" 3rd party audits to ensure adoption of industry defined best practices
- Full redundant power, network, and environmental controls
- Secure off-site disaster recovery between redundant data centers
- High availability to all of your mission critical applications

FAS Crime Lab LIMS

Discover an easy-to-use solution designed to streamline processes, manage resources, track evidence, and ensure top-notch security and compliance. Our user-friendly system is tailored to make your forensic laboratory operations seamless, allowing you to focus on your work while we take care of the intricacies.

FAS Breath Alcohol Database

We optimize the management of your breath alcohol program with our comprehensive solution, serving as the ultimate 'one-stop shop.' We elevate operational efficiency by consolidating instrument location tracking, trouble calls, operator certification training, and instrument maintenance and calibration. Simplify and streamline your processes with our integrated approach, ensuring a seamless and centralized solution for all aspects of your breath alcohol program management.

FAS Medical Examiner Case Management System

We streamline the entire MDI process, automating tasks from scene investigation through autopsy, report generation, toxicology processing, to seamless EDRS integration. Easily configurable to align with your specific work processes, our system is designed for rapid deployment. With a commitment to applying common sense solutions, we simplify intricate processes, ensuring efficiency and accuracy in solving complicated problems for your office.

FAS Sexual Assault Kit Tracking System

Forensic Advantage's SAK Tracking System is a distinctive and robust application meticulously crafted to enhance Sexual Assault Kit (SAK) processing requirements. Our innovative solution not only streamlines the processing workflow but also provides a unique feature for victims to monitor status updates. We believe in empowering survivors and advancing accountability, making a meaningful impact on the journey towards justice.
