

## Crime Lab Information Management System

Forensic Advantage for Crime Laboratories is an innovative, easy-to-use solution that helps forensic laboratories streamline processes, manage resources, track evidence, and ensure security and compliance.

*“The Forensic Advantage application platform gave us the ability to utilize our investment in Microsoft technology and through a combined offering provided a solution that improved the quality and efficiency of our laboratory and ensured collaboration and rapid results for our case analysis activities.”*

*-Judy Gordon, Forensic Services Director  
Charleston Police Department*

### Key Features

#### Pre Log

Helps users submit evidence forms online before their physical arrival, and agencies can view the status of their requests and download reports.

#### Evidence

Tracks property from collection through disposition and safeguards two-sided transfers by utilizing barcodes and password protected access, ensuring a true chain of custody.

#### Case Processing

Manages caseloads and allows supervisors to delegate and review assigned casework. Examiners can utilize features that automate the collection of exam results and the production of case-related documentation.

#### Resource Manager

Enables users to manage the location, status and disposition of items (e.g. instruments, firearms, reference materials, etc.)

#### Testimony

tracks subpoenas for expert testimony, leveraging Outlook to ensure that requested appearances are added to an examiner's schedule while gathering information to facilitate detailed reports.

### Reduces Costs

With full integration of Microsoft Office and availability on premises or in the cloud, Crime Lab also reduces costs and up to 80% of the paperwork associated with gathering evidence. Crime Lab collects and associates scientific analysis for evidence submitted, provides query and statistical reporting, facilitates inter-lab connectivity and generates documentation for use in court proceedings.
